Course Description

“Italiana. Introduction to Italian Culture, the High, the Low, and the In-between” aims at expanding the students’ knowledge of Italian culture and improving and refining their language skills, through writing, reading, speaking, and listening. Although the students will work on the same materials (articles, essays, poems, visual arts, music, and opera) and discuss the same topics, each assignment will include different levels of difficulty in order to be both appropriate and challenging for all the students in the class.

“Italiana” is a content based course in which the students will be exposed to the issues that are debated today in contemporary Italy, such as Italian identity, immigration, emigration, the cult of celebrity, and the truthfulness and deceptiveness of the brand Made in Italy. Naturally, considerable attention will be given to the cultural history of Venice, the enchanting city that will host the course. The students will learn about the distinctive traits of Venetian culture and compare them to those of other Italian cities. In addition to this, they will read Senso, a novella by Camillo Boito set in Venice, and will use the various places inhabited by its protagonists to create their own tour of the city. In order to deepen the students’ knowledge of Italian culture and take full advantage of the opportunities offered by being where this culture was and is produced, part of each class will be devoted to prepare for the visits to selected cultural sites, such as palaces museums and nearby islands, and for events like a concert of music by the Venetian composers Antonio Vivaldi and Tomaso Albinoni. Finally, the students will apply their communicative skills in Italian by conversing with the Italian university students involved in the Columbia University Summer Program and by conducting interviews with the Italian people they will become familiar with on the subjects studied and discussed in class.
